## 5. CONTRIBUTIONS TO ENHANCING DIVERSITY, EQUITY AND INCLUSION (DEI)

As a scholar working in global health equity, DEI is central to my work, and highlighted throughout my research and service statements. This includes significant scholarship and programmatic work aimed understanding inclusion/exclusion of marginalized people and regions and research on how to achieve equity in real-world political contexts. I am also particularly proud of successful DEI efforts that include:

- PI, *Lancet-O'Neill Institute Commission on Racism, Structural Discrimination & Global Health*.
- Director, Center for Global Health Politics & Policy, which is among the most diverse centers at Georgetown where 69% of staff are people of color, 54% were born in low- and middle-income countries, 62% are women, and 30% are members of the LGBTQ+ community.
- Fellowship program at the Center for Global Health Policy & Politics, of which 63% have been women, 88% have been people of color, and 63% were born in low- or middle-income countries.
